C. & G. SURVEY ARCHIVES

S i r :-

1. In obedience to Instructions and Memoranda for Descriptive Reports, 1887, I have the honor to submit the following report on Hydrographic Sheet No. 2697 :

2. The work consists of a special examination for^a reported 9-1/2 fathom spot, northeast from Mount Desert Rock, Me. The lines of soundings shown upon the sheet were run by the Steamers "Bache" and "Blake". Tanner - Bliss sounding tubes were used, and the sub-marine sentry set to a depth of from 15 to 20 fathoms, was run over all of the lines, without any indications of such a shoal having been found.

3. Numerous spots with shoaler water than is shown upon the published chart were located, with results showing an irregular bottom, but with evidence that there is nothing dangerous to navigation in the region developed.

(2)

4. No further descriptive report is considered necessary.

Very respectfully,

P. A. Walker

Assistant, C. & G. Survey,

Commanding.

a

Report
on
Hydrographic Sheet
NO. 2697,
Off Frenchmans Bay,
Between Petit Manan Island
and Mt. Desert Rock,
Me.
Assts. Wainwright and Welker.
1904.

The plotting and protracting were well done and the
records well kept.

H. L. Simons. (Signed).
